

Horizontal Shutters

AUTO-SET® H200 Series

The automatic closing H200 Series horizontal shutters prevent the migration of heat, smoke or hot/toxic gases by creating vertical compartments thereby separating the vertical spaces from one another. Horizontal shutters reduce construction costs. Smoke evacuation systems can become unnecessary and one horizontal fire shutter can be used in lieu of numerous conventional fire barriers on multiple floors.

Auto-Set® H200 | Horizontal Shutter

The Model H200 horizontal shutter is used to convert this atrium to a vertical compartment separation, lowering costs by eliminating smoke evacuation systems.

In this hi-profile retail environment, stainless finishes, vertical openings and total fire & life safety compliance are all possible with the McKeon horizontal assembly.

H200: Main Components

- | | |
|----------------------------|------------------|
| 1 Fire Door Motor Operator | 4 Curtain Slats |
| 2 Coil Box | 5 Receiving Edge |
| 3 Shutter Track | |

Product Features

Ratings

2-hour rated UL 10B*

Smoke & Draft labeled UL 1784

Code Compliance

CCRR-1086

Operation

Auto-Set® automatic resetting

Fail-Safe Design - automatic self-closing mechanism does not require power operation to self-close

Function

Interior and exterior applications

Coiling on the horizontal plane

Size

Widths to 32' and lengths to 110' (220' bi-parting); for larger sizes and custom configurations consult the factory

Finishes

McKeon sterling gray

Powder coat

Stainless steel

*Listed under the Canadian equivalent CAN/ULC S104

MODEL	OPERATION		EGRESS	FUNCTION
	Open	Self-Close		
H200	Auto-Set® Power Operator	Fail-Safe Mechanical	N/A	Coiling on the Horizontal Plane
H250 (Curved)	Auto-Set® Power Operator	Fail-Safe Mechanical	N/A	Coiling on the Horizontal and Vertical Plane
